

TIFEAGLE

SOARS AT SEA ISLAND

"I've got TifEagle greens here that are almost 14 years old with zero mutation and no contamination. It's going to be very interesting to me to see how the other new ultradwarfs do as they age."

*Berry Collett-Director of Golf Maintenance
Sea Island Golf Club, St. Simons Island GA*

You'll find TifEagle Bermudagrass on all three of the premier golf courses at the famous Sea Island Golf Club on St. Simons Island GA. The Rees Jones-designed Plantation Course, the Fazio-designed Seaside Course, and the Davis Love-designed Retreat Course all sport world-class TifEagle greens, the ultimate ultradwarf putting surface. Berry Collett, Director of Golf Maintenance for the Sea Island Golf Club, is responsible for the day-to-day management and upkeep of these top-flight resort courses. In addition Berry oversees Ocean Forest, the company's private course on the north end of the island. It also

has TifEagle greens. As Berry points out, "Our golfing guests have very high expectations. They're looking for speed, consistency and quality, and TifEagle gives them all three." So whether you're thinking about renovating your existing greens, or involved with planning a brand new facility, take a lesson from Berry Collett. Insist on the best. Specify certified TifEagle Bermudagrass by name. You can sod it, sprig it and even no-till it under the right conditions. For more information and a list of authorized TifEagle growers, visit us on the web or call 706 552-4525.
